Junior Portfolio Expert

Company and Role Description:

Energy is a renewable energy producer operating 59 power plants (solar, wind, and hydro) spread across Central and Eastern Europe. Working with companies, utilities, and governments, we are helping to reduce our region's dependence on fossil fuels and embrace cleaner and more sustainable forms of energy. At the core of our organization lies an energetic team consistently seeking innovative ways to elevate the impact of renewable energy in our daily lives.

You have the opportunity to join our Portfolio Optimization team, playing an important role in:

- Monitoring of daily processes related to forecasting, trading, and price data collection.
- Monitoring of the process of receiving metering data from SCADA (internal monitoring system) in real time.
- Assisting in implementation of renewables assets in software applications/ETRM.
- Creating and submitting orders to the Southeast Europe (SEE) and Central & Eastern Europe (CEE) PXs' spot markets (Day-ahead and Intraday segments) based on forecasted production updates.
- Creating and submitting trading and availability/generation schedules to the SEE and CEE TSOs (TPSs and PPSs).
- Preparation and submitting market reports to energy regulators and other authorities in SEE and CEE regions.
- Support Energy trading activities
- Support Energy commercial division

What we are looking for:

- Student/graduate in Engineering and/or Economics
- Knowledge and/or experience in renewable energy markets and/ or energy trading is advantageous, but not required.
- Fluency in English is essential.
- Strong analytical and numerical skills
- Proficiency in using Excel, Word and Power-Point is advantageous.
- Detail-oriented

What we offer:

- Full-time or part-time
- Competitive salary
- Benefit package: health insurance, food vouchers, commuter card, personal learning & development budget
- Attractive annual bonus based on personal performance.
- Flexible working schedule
- Opportunity to growth and develop within the organization.
